HOLMBERG MECHANICAL'S ANNUAL TOY DRIVE BENEFITTING HARBORVIEW Focusing on Pediatric Burn and Trauma Unit

**HARBORVIEW
MEDICAL CENTER**

[BELLEVUE, WASHINGTON, DECEMBER 1, 2020] — A holiday season during a pandemic is one thing, but to spend a COVID-19 Christmas while a hospital patient, or the parent of one, is another. Holmberg Mechanical has its sights set on making this holiday as bright as possible for the kids at Harborview's Burn and Trauma unit.

Harborview Medical Center is the only designated Disaster Control Hospital for Seattle and King County. It also serves Alaska, Idaho, and Montana for emergency services. It is one of the largest burn units in the United States, specializing in pioneering treatments, including the use of artificial skin products. Since opening in 1974, the Burn and Trauma unit has treated nearly 20,000 patients, one-third of whom are children. The survival rate is over 97%.

"This year's toy drive is extra special and we want to do as much as we can for these children who are suffering so much", Holmberg Mechanical's CEO/President, Jeff White. "They were not planning on being in a hospital during this time of year, so we want to make sure they each get presents to open Christmas morning. If we can put a smile on one kid's face and make them feel special, that will be worth everything."

To participate in this event, please drop off or mail new, unwrapped toys to Holmberg Mechanical, 15400 SE 30th Place, Suite 100, Bellevue, WA 98007. A list of toy suggestions is available on their Instagram page.

Holmberg Mechanical is a full-service mechanical contractor proudly serving the Puget Sound region on large scale commercial projects since 1949. Holmberg Mechanical is currently working on several exciting projects such as Avenue Bellevue, several parts of Sound Transit's East Link Expansion, and more.
